

I believe that the FCC should reject the NAB's petition 04-160. Satellite radio is a service I pay for monthly as an alternative to the below average quality of FM/AM radio. Stopping XM from providing their XM Instant Traffic & Weather would be wrong. It not only is more accurate than FM/AM stations, XM's service of weather/traffic is part of a service I pay for monthly. It's also information that should not be controlled, your average full time employee like me relies on the most accurate traffic reports which XM provides.
